

Groundsearch Australia

Downhole Wireline Services Information Package

February 2011

1.0 Background

Groundsearch Australia Pty. Limited is an Australian-owned company that was formed in 1992 as a broad-based, independent consulting and contracting group.

It continues to provide data acquisition and review services in the civil engineering, coal mining, mineral exploration, CSM and environmental fields for some of the world's major corporations.

It has a large established client base and provides downhole logging services in New South Wales, Queensland, Victoria, South Australia, Tasmania and Papua New Guinea.

Current clients include:

- AGL
- BHP Billiton
- Coffey Geotechnics
- Douglas Partners
- Department of Industry & Investment – NSW
- Felix Resources
- Liberty Resources
- Oil Search Limited
- Peabody Energy
- Rio Tinto
- Shenhua Watermark Coal
- Xstrata

Groundsearch is Century Geophysical Corporation's Global Partner for Australasia and is their authorised technical representative for maintenance and repairs for their equipment operating in the Asian region.

This gives us unmatched technical support for the Century Geophysical equipment which we operate allowing for increased equipment performance and the ability to adapt to individual client needs.

Expansion into specialised, cased hole technologies will reduce a third party requirement for some well completion services.
