

DHEM/MMR acquisition in NSW

Mitre Geophysics

Groundsearch Australia in partnership with Australian Geophysical Services will have boots on the ground in NSW from early April carrying out data acquisition for DHEM on a variety of projects for new and existing clients.

Utilising the latest technology combined with the most experienced professionals in the field of DHEM and MMR we are able to offer our clients a complete package to ensure data maximisation on exploration projects across NSW.

We are excited to get this new venture operational and look forward to being able to offer our clients a comprehensive exploration geophysics and petrophysics package to the highest of industry standards.

Providing our clients with a comprehensive solution to exploration geophysics from the inception to the completion of a project.
